		193		ENGINEERING INSTRUCTION	
		Bureau		NEW YORK STATE DEPARTMENT OF TRANSPORTATION	
		ECT.		STANDARD SHEETS FOR SIGN STRUCTURES	
SUPERSEDED BY EB 99-014					
EFFECTIVE 2/23/99			Subject Code: 7.27-2-644		
Distribution:				Code: EI 87-38	
30 Main Office		32 Regions		34 Special	
APPROVED:				Date: 10/22/87	
 J. M. YOURNO, Acting Deputy Chief Engr., Fac. Design Division				Supersedes: EI 83-4 EI 85-4 EI 84-4 EI 87-17	

Attached are five new standard sheets numbered 644-3 through 644-7. These sheets used to be Standard Drawings 644-3, 644-4, 644-5, 644-6R1, and 644-7R1. As such, they were physically inserted into the plans of all projects containing item numbers 644.01 through 644.05. In the interest of saving time, money, and cutting down on the amount of printing and the quantity of paper used, these drawings have been made into standard sheets. This necessitates that the designer reference these standard sheets on the cover sheet of the estimate as is current practice with all standard sheets.

Additionally there are two standard drawings (644-1R1 & 644-2) that are still in effect. These sheets require the designer to fill in project specific information and therefore could not be adapted into standard sheets. The practice of completing these sheets and including them in the project plans will continue.

This Instruction takes effect with the letting of January 28, 1988.
