APPROVED:  <hr style="width: 50%; margin-left: 10%;"/> <div style="text-align: center;">11/19/91</div>	Date: <u>11/22/91</u> Supersedes: EI 88-031			

The New York State Department of Transportation Standard Specifications for Highway Bridges, dated June 1988, has been revised. The new edition, dated April 1991, consists of the 1989 AASHTO Standard Specifications for Highway Bridges as modified by the 1990 AASHTO Interim Specifications and by the New York State 'Blue pages'.

The complete set of 'Blue pages' dated April 1991, issued with this Engineering Instruction replaces all previously issued 'Blue pages' for the New York State Standard Specifications for Highway Bridges.

The 'Blue pages' are required to be combined with the 1989 AASHTO Standard Specifications and the 1990 AASHTO Interim Specifications for Bridges. The resulting text shall be considered as the New York State Department of Transportation Standard Specifications for Highway Bridges, dated April 1991.

The entire text of the new specification will be distributed to appropriate Department personnel. The Department will provide "only" the New York State modifications, in the form of 'Blue pages' as inserts, for distribution to consulting engineers through Department's Plan and Publication Sales Section.

Upon receipt of this material, the new edition of the specifications shall be considered in effect for all structural design projects, unless it is apparent that implementation of such will result in undue delay to projects currently under design.
