30 Main Office	32 Regions	34 Special		
APPROVED: <div style="text-align: center;">  <hr/> J. R. Lambert, Deputy Chief Engineer </div>				

This Engineering Instruction transmits a new Standard Sheet 608-4, Details for Accessible Handicapped Parking. The standard sheet applies to all Department projects regardless of funding source, including those projects designed, let and constructed by other agencies using pass through monies.

Standard Sheet 608-4 provides technical details for the design and construction of accessible routes associated with parking spaces reserved for use by the physically handicapped. The details are consistent with the requirements of state and federal regulations including the New York State Uniform Fire Prevention and Building Code and the Uniform Federal Accessibility Standards. As such, the standard sheet is effective immediately for all projects under design and under construction.

This standard sheet is not expected to affect the cost of Department projects as it simply defines striping configurations, sign locations and other details that are routine parts of parking lot construction.

Contact Mark Sengenberger at (518) 457-4460 to resolve questions regarding the applicability of this instruction.
