TO:  Director, Preliminary Plan Review Bureau	 <b>ENGINEERING INSTRUCTION</b> NEW YORK STATE DEPARTMENT OF TRANSPORTATION  SUBJECT: PAYMENT FOR STRUCTURAL STEEL  Subject Code: 7.30
Distribution: <input checked="" type="checkbox"/> Main Office <input checked="" type="checkbox"/> Regions <input type="checkbox"/> Special	Code: <u>EI 73-54</u> Date: <u>7/27/73</u> Supersedes:
APPROVED:  <u>Deputy Chief Engineer (Construction)</u>	

This instruction is intended to expedite payments to contractors for structural steel which have generally been delayed by administrative processes with undue burden placed on the contractor.

When shop inspection is provided to the Department, Evidence of Acceptability for M6 Structural Steel consists of the acceptance stamp of the inspection agency affixed to the members plus the "Report of Shipment of Structural Steel" (Form B & GC 4b).

Due to the inherent delays in processing the B & GC 4b forms, progress estimate payments may be made on erected structural steel before the receipt of said Report of Shipment form, provided the members have the proper acceptance stamp. The B & GC 4b form still is required as a part of the evidence of acceptability and must be in the project records before final payment is made. When the "Report of Shipment of Structural Material" arrives at the project, the inspector shall still check the shipment against the report.

Revisions to MURK will be made at a later date.
