Standard Sheet 70-43C issued by Instruction 70-61 and Standard Sheet 645-5 issued as stated in EI 73-28 and both titled "Typical Construction Identification Signs" are no longer to be used. This results from a change in the Federal Highway Act (Stat. 525 of the 73 Highway Act) which states no signs other than those which are in the Federal Manual of Uniform Traffic Control Devices may be used on a Federal Aid Project.

We have also completed the distribution of the new Standard Sheets, listed on the "Index to Standard Sheets" distributed with EI 73-28. Please note the following three sheets listed in the Index have been deleted:

- 630-2 Highway Barrier
- 655-1 Drainage Structures
- 655-2 Welded Curb Box & Grating

In the event you have not received all the Standard Sheets listed in the Index, please send a memorandum listing the sheets you did not receive to:
