This Engineering Bulletin Expires _____

Distribution of the new Construction Supervision Manual will begin within a week or two. Regional Construction Groups will receive approximately one-half the quantity requested in the initial shipment with the remainder following in a later shipment. Special three-ring loose-leaf binders are on order with delivery expected in two to three months. In the interim, any available standard three-ring binder may be utilized by recipients.

Regional Construction Groups are responsible for distribution and control of all Manuals issued by them to personnel in the Regions. Division Directors in the Main Office similarly will be responsible for distribution and control of all Manuals issued to personnel of their respective Divisions. The foregoing requires the maintenance of a listing of each Manual holder by name for purposes of distributing revised pages in addition to recall and reassignment of Manuals as personnel changes occur.

Listed below are previously issued Deputy Chief Engineer General Letters, Instructions and Engineering Instructions which become obsolete upon receipt and use of the Construction Supervision Manual. Please note, however, that for any ongoing or recently completed project on which one or more of the listed directives are particularly applicable, a copy thereof should be retained in the project records.

Each page of the Construction Manual is dated, e.g., 4/1/81, and listed by page number in the Table of Contents. Revisions to the Manual will be issued on April 1, and/or October 1, when required. Revised pages will indicate the date of issue and updated Table of Contents pages will be issued at the same time. A brief review of the Table of Contents will indicate the date of the most recent revision entered in the Manual. Manual revisions will be furnished in quantities identical to the initial distribution.

At present, there is no supply available for sale to contractors or other interested parties. Should a sufficient number of requests be received to enable printing and sale at a reasonable cost, consideration will be given to doing so at a later date.
