TO:  <i>OBsolete</i>  <b>SUPERSEDED BY EI 73-003</b> <b>EFFECTIVE 4/12/1973</b>	 <b>ENGINEERING BULLETIN</b> NEW YORK STATE DEPARTMENT OF TRANSPORTATION
Distribution: <input checked="" type="checkbox"/> Main Office <input checked="" type="checkbox"/> Regions <input type="checkbox"/> Special	Code: <u>EB-2-36</u>
APPROVED:  Ass't. Deputy Chief Engineer (Construction)	Date: <u>8/31/72</u>  Supersedes: EB-2-33 dated 8/21/72

This Engineering Bulletin Expires Nov. 1, 1972

This Bulletin supersedes the previous bulletin on this subject by adding information concerning current requirements for construction barricades.

Reference is made to Engineering Instruction EI-72-30 transmitting Standard Sheets 72-43A, 43B & 43D. These new construction signs have been incorporated into all contracts let since June 22, 1972. Please ensure through preconstruction meetings and follow-ups that contractors are aware and are in compliance with the new orange. (and green on Engineer's Office) reflective material requirements.

It should also be noted that all contractors now have the option of substituting barrels or drums striped with reflectorized white on nonreflectorized orange in lieu of the reflectorized white on black currently required. In addition, contractors have the option of substituting barricades of reflectorized white on reflectorized orange in lieu of the reflectorized white on black currently specified.

A specification for M18P-Orange Finish Paint was incorporated into several recent proposals. The first section, titled "Scope" is misleading because the orange paint specified, which is not reflectorized, can only be used on drums.
