PURPOSE

This Engineering Bulletin announces the issuance of the Construction Division Safety and Health Program Manual (MURK Part 1C), dated April 1996. It also lists the Engineering Instructions that are superseded by this issuance and provides a list of EB's incorporated into the Manual.

BACKGROUND

The Construction Division is in the process of revising and consolidating the Manual for Uniform Recordkeeping and the Construction Supervision Manual. When completed, there will be four separate manuals to replace the CSM and MURK - the Contract Administration Manual, the Construction Inspection Manual, the Materials Inspection Manual, and the Safety and Health Program Manual. The Safety and Health Program Manual (MURK Part 1C) is a comprehensive reference to all aspects of the administration of safety and health requirements on Department contracts that apply to contractors' construction operations, to construction program staff, and to construction inspection consultants' staff. A final chapter of the Manual, addressing Maintenance and Protection of Traffic, will be issued at a later date.

DISTRIBUTION

Copies of the Manual will be distributed separately through the Regional Construction Groups to all Regional Construction Engineers, Engineers-in-Charge, Regional Design Engineers, Supervisors, and by the Main Office Construction Division to Main Office Construction Division personnel, and Division heads and to Contractors' Associations. A limited number will be available to other Department personnel on request from the Construction Division. Others who would like a copy may purchase one by contacting:
