APPROVED:			Supersedes:
 MALCOLM D. GRAHAM, Deputy Chief Engineer (Fac. Design)			

We are transmitting, under separate cover, a revised Standard Sheet for Cast Iron Frames and Curb Boxes.

Section AA, Cast Iron Frames, F1, F2 and F3 on this Standard Sheet, has been revised to permit an option allowing nuts and bolts or stud bolts rather than just stud bolts.

The filler plates are now shown as an option because the frames and curb boxes are now so well machined that the filler plates may not be necessary.
