PRELIMINARY PLAN REVIEW
 BUREAU
 JUL 12 1978
 ROOM 408 BLDG. 3

We are transmitting, under separate cover, Standard Sheet 606-10 Heavy Post Blocked-Out Corrugated Beam Median Barrier Approach End Treatment. This new standard sheet completes the series of standard sheets transmitted by EI 77-32.

The specifications and criteria are the same as transmitted with EI 77-32 and in Section 606 of the Standard Specifications except we have added the following pay item to the list of pay items on Page 6-19 of the Standard Specifications of January 3, 1978.

606.35 Anchorage Units for Heavy Post Blocked-Out Corrugated Beam Median Barrier

This new Standard Sheet and the revision to the specifications will take effect with the letting of October 19, 1978.

The use of this end section shall be restricted in accordance with the following design controls.

1. On unrestricted speed highways and associated ramps the approach end of this median barrier system shall either be anchored outside the clear zone and converge with the roadway at a rate of 1:15 or be preceded by a properly designed crash cushion.
2. On reduced speed facilities, at signal controlled intersections, and at stop conditions, the approach end shall be offset the maximum distance possible.
