Code: EI 80-1

Date: 1/3/80

APPROVED:

Lyndon H. Moore
LYNDON H. MOORE, DIRECTOR, SOIL MECHANICS BUREAU

Supersedes:

EI 72-56

The Soil Control Procedure for SETTLEMENT GAGES AND SETTLEMENT RODS, originally numbered SCP-3, has been rewritten and reissued as SCP-7. Soil Control Procedure SCP-7 shall become effective on April 1, 1980, and shall apply to all projects let on or after that date.

Modifications to the manual include changes in installation details, data collection forms and improved readability. The only major change in hardware has been to the manometer settlement gage which will now be a three line system rather than a two line system.

Copies of Soil Control Procedure SCP-7 - SETTLEMENT GAGES AND SETTLEMENT RODS are available upon request from the Soil Mechanics Bureau or the Regional Soils Engineer.
