# ENGINEERING INSTRUCTION

NEW YORK STATE DEPARTMENT OF TRANSPORTATION

Director,  
Preliminary Plan Review Bureau

SUBJECT: INCLUSION OF SIGN AREA ON THE PLANS

Subject Code: 7.27-1-645

Distribution:

Main Office

Regions

Special

Code: EI 80-6

Date: 1/30/80

APPROVED:

CHIEF ENGINEER

DESIGN & CONSTRUCTION DIVISION

Supersedes:

Effective with the June 26, 1980 letting the area of all signs and sign assemblies shall be shown on the plans. To accomplish this an additional column headed Sign Area shall be added to the Sign Text Data Sheet. Signs not contained in the Sign Text Data Sheet shall have the area indicated where the sign is detailed.

Area shall be calculated to the next larger 0.1 sq. ft. In the case of sign assemblies of more than one sign panel, the area given shall be the sum of the areas of each individual panel.

This requirement is necessary because the Department is adopting new posts for regulatory, warning and other small signs. These will be posts approved by the Department and placed on an approved products list. The Contractor will determine post size and number of posts based on mounting height and sign area.

A note deleting the present angle sign posts and requiring approved posts will be incorporated in the proposal by the Final Plan Review Bureau. This note will also contain a description of all approved posts and any construction details necessary for proper installation of the post and for attachment of the sign panel to the post.
