APPROVED:

R. H. Edwards, Deputy Chief Engineer, Facilities Design Division

Supersedes:

EI 79-42 details the requirements for separation of PS&E submission into separate contracts for electrical, plumbing, and HVAC work on DOT building projects.

As a matter of routine procedure, Item 699.01 Mobilization has been included in the estimates. Unfortunately, the specialty contractors that usually bid these projects are not familiar with our proposal requirements and on several occasions have returned their proposals with no bid for this item. This made their bids informal. Furthermore, there is little or no need for this item on these specialty contracts. Therefore, effective immediately, do not add mobilization (Item 699.01) to plumbing, electrical, and HVAC contracts; however, the item should be added to General Building Contracts.
